# Setting Up the Local Personal Cloud

3<sup>rd</sup> LED lighted  
- Charging

2<sup>nd</sup> LED lighted and blinking  
- WiFi active

One LED lighted  
- Device ON

# ***Windows Setup***

Once the Wifi Cloud is active and stable.  
Select the “Strontium Wifi Cloud” network

Open a web browser and key in “http://10.10.10.254/Control/index.html” and ENTER key. This will bring up the mobile wifi cloud main page.

The image illustrates the steps to access the mobile wifi cloud main page. It consists of three sequential browser screenshots:

- Top Screenshot:** A Google search for "10.10.10.254". The search bar and the search results are highlighted with a red box. A blue arrow points from the search bar to the next screenshot.
- Middle Screenshot:** A browser window showing a "This webpage is not available" error message with the status "DNS\_PROBE\_STARTED" and a "Reload" button. A blue arrow points from this screenshot to the final one.
- Bottom Screenshot:** The "Strontium WiFi Cloud" main page. The page features the "Strontium WiFi Cloud" logo and the "MOBILE WIFI CLOUD" logo. A yellow navigation menu is visible on the left side, listing the following options: STATUS, SYSTEM, NETWORK, WIFI, SECURITY, and TOOLS.

**MAC OS**

You can use MAC OS Finder Tools and Find Strontium WiFi Hub to access data.

**Apple App**

You can search Strontium Hub app from Apple App store.

10.10.10.254/Control/bin/StrontiumHub.exe

StrontiumHub.exe

Input 'admin' as the default "User name" and "Password".  
Click "OK" when done.

# Setting Up Local Personal Cloud with internet access

Connecting to local network Access Point (AP)  
Select the desire local network and input the password

The screenshot shows a web browser window with the address bar displaying `10.10.10.254/Control/index.html#wifi`. The page features the Strontium WiFi Cloud logo and a navigation menu on the left. The menu items are STATUS, SYSTEM, NETWORK, **WIFI**, SECURITY, and TOOLS. A red arrow with the number '1' points to the 'WIFI' menu item. On the right side of the page, the 'MOBILE WIFI CLOUD' logo is displayed above the word 'WiFi'. Below this, a list of available WiFi networks is shown in a table-like format. The networks listed are DVSG\_FIBER, HON NENG MARKETING PTE LTD, NETGEAR41 (with a 'connected' status), Charlie, and STPL. A red arrow with the number '2' points to the 'NETGEAR41' network entry.

**STRONTIUM**

Now can browse the internet and access email

Once reset and signal is stable.

Reconnect to the “Strontium WiFi Cloud’ AP.

Connect the mobile gadget (IOS or Android) to the wifi cloud.

Verify the Status to ensure the AP is connected.  
Email and other social apps will be able to work.  
Transfer rate will be affected dependent on the number of user and usage.

# Remarks

Steps in page 3 to page 9 need to do only once.

There after when connecting the mobile gadget to the wifi Cloud.

There is no need to reconnect the AP using the mobile gadget.

Furthermore, as most of the IOS device will auto connect to the AP with the best signal.

It is preferably to disable or disconnect others AP the IOS device had already connected before.

This will allow the IOS mobile device to solely link to the wifi cloud and reduce anomaly which might occur.

# ***Mac Setup***

Input default User and Password as “admin”

***The End***
